LUKOIL MARINE LUBRICANTS OPENS NEW WAREHOUSE IN GOTHENBURG

The marine lubricant specialist is constantly striving to expand its global supply network and with the new warehouse in Gothenburg, the company achieved reduced lead time and increased flexibility when delivering lubricants to vessels calling at Scandinavian ports.

LUKOIL Marine Lubricants is a global company offering a full range of highest quality marine lubricants in all major ports around the globe. Their state-of-the-art marine grade range covers main and minor grades of proven quality. The company serves the Scandinavian markets from their order department in Hamburg, where experienced order managers take care of customers' requests and order processing. In cooperation with their new logistics partner for Scandinavia TJOSAB AB, LUKOIL Marine has achieved to further improve the availability of their full product range in the Scandinavian markets.

The staff of LUKOIL Marine Lubricants is always willing to go the extra mile to ensure that the customers receive excellent service. They are available at all times — 24 hours per day, 365 days per year, and customers will experience excellent operational support developed by people, who know the business.

About LUKOIL and LUKOIL Marine Lubricants:

LUKOIL is the leading Russian company in exploring, producing, refining and marketing petroleum products. LUKOIL was established in 1991 through the merger of a group of oil-and-gas production companies located in the western Siberian cities Langepas, Urai and Kogalym, whose initials form the acronym LUK. In 2007 LUKOIL decided to bring its expertise in lubricants technology to the marine industry. LUKOIL Marine Lubricants was founded as a stand-alone global sales and marketing business focusing on the production and sales of marine lubricants worldwide. Since then the company already positioned itself as technology leader with the introduction of the first 100 BN cylinder oil as the answer to severe corrosive wear issues of modern engines and the development of iCOLube®, an onboard unit for intelligent cylinder oil lubrication.
